

Lone Star ITS - Startup Plan

Business name: Lone Star ITS.

Domain: lonestar-its.com.

Positioning: Family- and veteran-owned managed technology services for small businesses.

Core services: Managed IT Support; Network Setup & Security; Backup & Recovery; Cybersecurity & Audits; Cloud, Email & Websites; Web Design & Management; Device Lifecycle Management.

Launch checklist: verify business entity naming, verify domain ownership, configure GitHub

Pages custom domain, enforce HTTPS, configure Formspree, deploy Cloudflare Worker, set Worker API secrets via environment variables, and review legal notices with counsel.

Security checklist: enable MFA on GitHub/Squarespace/Cloudflare/Formspree, use password manager, rotate old secrets, avoid credential collection through website forms, and keep DNS records minimal.

Legal checklist: run trademark and business-name searches, review privacy policy/terms/SLA with counsel, document service scope in written agreements, and avoid using the registered trademark symbol unless registration is approved.
